

James Cooper

Real-time Trading Tech Lead

James joined Blis in 2012 and is responsible for the design and implementation of the software that executes Blis' buying and selling strategies. In addition, his day to day job includes keeping Blis' proprietary C++ technology stack up to date with the latest industry standards and products.

After graduating from University College Cork, Ireland in 2004 with an MSc in Computer Science, James moved to London. Before joining Blis he also worked for several years creating and perfecting embedded software for the mobile phone industry.

Outside of work James enjoys cycling, hiking and the occasional beer.
